

MOHAMMED WALID IBRAHIM EL-HENAWI

Cybersecurity Student | Aspiring SOC Analyst | Networking & IT

Cairo, Egypt | +20 103 259 1196 | mohammedelhenawi2@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity student at Arab Open University, entering the third year, with hands-on foundations in networking, network security, incident-response concepts, programming, and modern web development. Experienced in designing Cisco Packet Tracer networks and building production-style portfolio applications with Vanilla JavaScript, React, and Supabase-oriented full-stack architecture. Currently developing practical cybersecurity skills through the DEPI Cyber Security Incident Response Analyst track and Cisco CCNA studies. Seeking internships in Cybersecurity, SOC, Networking, or IT where strong learning ability, technical problem solving, and disciplined project execution can contribute from day one.

EDUCATION

B.Sc. in Cybersecurity — Arab Open University (AOU) | Expected Jul 2028

Relevant Coursework: Network Security, Computer Networking, Programming, Java, Python, Web Development

TECHNICAL SKILLS

Cybersecurity & Systems: Cybersecurity Fundamentals, Network Security Fundamentals, Incident Response Fundamentals, Linux, VMware

Networking: TCP/IP, VLANs, Trunking, Routing, Static Routing, DHCP, DNS, NAT, Subnetting, VLSM, Cisco Packet Tracer

Programming & Web: Python, Java, HTML, CSS, JavaScript, React, Vite, LocalStorage, REST-style architecture, Supabase architecture

Development Tools: Git, GitHub, GitHub Pages, VS Code

SELECTED PROJECTS

ServiceFlow — Booking & Business Management Platform | React | Vite | Supabase Architecture | PostgreSQL/RLS | TanStack Query | [Live Demo](#) | [GitHub](#)

- Built a responsive SaaS-style booking and business-management platform covering appointments, customers, staff, services, invoices, simulated payments, notifications, reports, and role-based user experiences.
- Designed a Supabase/PostgreSQL backend architecture with migrations, RLS policies, RPC/Edge Function patterns, double-booking protection, and a tested demo provider; 18/18 automated business-logic tests pass.

CyberWatch — Personal Security Dashboard | React | React Router | Context/useReducer | Recharts | [Live Demo](#) | [GitHub](#)

- Developed a mobile-first cybersecurity dashboard for alerts, incidents, devices, IOC exploration, analytics, investigation notes, and persisted status updates.
- Implemented reusable components, protected-style routing patterns, derived security metrics, charts, search/filter/sort workflows, local persistence, and responsive desktop/tablet/mobile layouts.

FlowTask Pro — Project Management Dashboard | HTML | CSS | Vanilla JavaScript | LocalStorage | Chart.js | [Live Demo](#) | [GitHub](#)

- Built a modular multi-page project-management application with Kanban drag-and-drop, project/task CRUD, calendar, analytics, advanced filtering, themes, JSON backup/restore, and responsive design.

Cisco Packet Tracer Network Labs | Networking

- Designed and configured complete network topologies using VLANs, trunking, routing, static routing, DHCP, DNS, NAT, subnetting, and VLSM; validated connectivity and practiced structured troubleshooting.

TRAINING & PROFESSIONAL DEVELOPMENT

DEPI — Cyber Security Incident Response Analyst | In Progress

Cisco CCNA | In Progress

Cisco Networking Academy: Introduction to Cybersecurity; Networking Basics

Additional Training: Web Development, Soft Skills, Robotics, AMIDEAST English Level 12

LANGUAGES & STRENGTHS

Arabic: Native | **English:** C1 / Advanced (AMIDEAST Level 12) | **Strengths:** Fast Learning, Adaptability, Time Management, Technical Problem Solving, Teamwork
